Digital Business Transformation

One of the key take-ways from **Citrix Synergy** (the annual Citrix event in the USA) last week for me is the key note from Citrix' CEO Kirill Tatarinov. According to him: *“Work is no longer a place, it's an activity, and workers expect a workspace that is digital and follows them wherever they go”*.

At Asiasoft Solutions, our mission is to provide innovative cloud solutions and add value to our clients digital business transformation. [Read more](#)

Citrix Synergy 2017 Highlights

If you have not been able to attend [Citrix Synergy](#) last week, but want to know what has been announced or is new, I recommend the following recorded sessions:

Vision Key Note - Cloud

Cloud-first solutions [Synergy Recording](#) / [blog](#)

Technical Key Note - Security

Citrix: New Generation Security Provider [Synergy Recording](#) / [blog](#)

What's New & Roadmap XenApp and XenDesktop

W10, same code for on-prem & *cloud* releases, 7.6, etc. [Synergy Recording](#) / [blog](#)

Citrix App Layering

Layer both applications and the OS (former *Unidesk*) [Synergy Recording](#) / [blog](#)

Secondly I would like to highlight our **Twitter** account [@TeamAsiasoft](#) and our other social media channels where we share news from our partners like Citrix, Nutanix, VMware, HPE, TrendMicro, Nimble and many more. We also share the results of our **Workshops** and other events. Thank you.
[Ida Stegmeijer](#) (Asiasoft Solutions Product Manager)

Register for our upcoming Event

Workshop: Ransomware - Fighting Back

Sophos Security Update Session

-Workshop & Demo-

June 9: 1.30PM - 5PM

@Suntec, 1 Raffles Boulevard, Singapore

Successfully virtualize *Skype for Business* for your VDI

Skype for Business is becoming one of the biggest unified communication solutions for organizations. However traditional virtualization delivery methods can significantly degrade performance for Skype, and a frustrating user experience can undermine adoption. [Read More](#)

Use Case: **Okada Manila Luxury Resort** - *Finalist Citrix Innovation Award*

Tiger Resort – Okada Manila is one of the largest luxury hotel resorts in the world. The resort supports 2,000 endpoints and chooses the **Citrix Workspace Suite** (including *XenApp*, *XenDesktop* and *ShareFile*) with **NetScaler** and **Cisco ACI** to address their needs to *securely deliver apps and data* to their employees on demand. How do they protect their corporate data? And what made this project an Innovation *Finalist*? [Read Here](#) or [Watch this Video](#).

NetScaler MAS:

Real-Time Analytics and Datacenter Automation

Are you using NetScaler MPX, SDX, VPX, CDX or SD-WAN? But you haven't heard of MAS (**NetScaler Management and Analytics System**)? Read how this can help you. MAS helps administrators to proactively identify and rapidly troubleshoot application performance and security issues across the application infrastructure. It works across all the Citrix product lines, not just Netscaler and the integration on application level with external orchestration systems allows you to have all the information for problem solving in one view.
